**Notes:**

1. Some states within the US and Brazil are also listed as non-lockdown; these have been disregarded. See [https://en.wikipedia.org/wiki/COVID-19\\_pandemic\\_lockdowns#Countries\\_and\\_territories\\_without\\_lockdowns](https://en.wikipedia.org/wiki/COVID-19_pandemic_lockdowns#Countries_and_territories_without_lockdowns)
2. The table demonstrates that the 203 countries classified as 'locked down' had **more than 4 times** the reported death rate than the above 12.
